We all know it's a difficult time full of worry and anxiety talk to the kids about the virus and need to stay safe by staying home and following good hygiene practices. But do not let your fear and anxiety express upon the children to make them insecure and fearful as it can have long term psychological problems the ill effects of which we will be struggling with long time. Resort to positivity and do not fear!

Setting and following a routine is very important so make sure your child goes to sleep on time and gets up on time everyday to make transitioning into school timings easy. Add little physical exercise to the routine parents can do little yoga and breathing exercises with kids every morning for this. Fresh air and morning sun should be a must for children be it the garden or terrace.
